ORGANIZATION INDEX 109

Foreword

Reaching Out: A Directory of National Organizations Related to Maternal and Child Health has been compiled by the National Center for Education in Maternal and Child Health (NCEMCH) to provide a reference to national organizations with a maternal and child health focus. Information for this third edition was obtained by communicating with organizations in the United States and Canada.

Part One of *Reaching Out* lists national organizations by subject area. These organizations provide a variety of services and activities, including publishing educational materials, disseminating general information, making referrals, and furnishing support to assist the health professional or the health care consumer in meeting a specific need.

Part Two lists self-help clearinghouses. These organizations collect and disseminate information about local self-help groups and assist in the formation of new groups. This section is arranged alphabetically by state.

Two indexes are included. The first is a detailed subject index. The second is an alphabetical list of all organizations.

The National Center for Education in Maternal and Child Health would like to thank all the organizations that provided information for this directory. *Reaching Out* will be updated and expanded for future editions; suggestions and changes may be directed to:

Self-Help Clearinghouses

Self-help groups offer people who face a common problem the opportunity to meet with others and share experiences, knowledge, strengths, and hopes. Self-help clearinghouses collect and disseminate information about local self-help groups and assist people in forming new groups. Self-help clearinghouses differ in their ability to provide information and referrals. This list of self-help clearinghouses is organized by state. If you are unable to locate a service to meet your needs, we suggest you contact your state mental health association. In addition, the National Self-Help Clearinghouse, the New Jersey Self-Help Clearinghouse, or the National Center for Education in Maternal and Child Health may be able to provide a referral.
